

Table 4 Refraction and corneal measurements at one year

Footnote: each endpoint uses the prespecified one-year visit and its own valid measurement availability. Summary means mean(SD) and median[IQR]; change is follow-up minus baseline for paired eyes. Expand rows/columns in final results for readability. Do not call a change beneficial or a proof of stability without clinical interpretation and longitudinal evidence.

Measure (unit)	Combined: endpoint / change	ACXL: endpoint / change	Difference in mean change
Sphere (D)	[n; summary / paired n; change]	[n; summary / paired n; change]	[estimate; 95% CI]
Cylinder (D)	[n; summary / paired n; change]	[n; summary / paired n; change]	[estimate; 95% CI]
Spherical equivalent (D)	[n; summary / paired n; change]	[n; summary / paired n; change]	[estimate; 95% CI]
K1 (D)	[n; summary / paired n; change]	[n; summary / paired n; change]	[estimate; 95% CI]
K2 (D)	[n; summary / paired n; change]	[n; summary / paired n; change]	[estimate; 95% CI]
Kmax (D)	[n; summary / paired n; change]	[n; summary / paired n; change]	[estimate; 95% CI]
TCT (micrometres)	[n; summary / paired n; change]	[n; summary / paired n; change]	[estimate; 95% CI]
