

Table 5 Recorded complications and additional procedures

Footnote: no event requires explicit negative assessment or source-adjudicated documentation; an empty haze field is not no haze. Present descriptive events and assessment completeness. No haze-resolution curve is planned without dated onset/resolution and censoring evidence.

Recorded outcome	TG-PRK + ACXL	ACXL alone	Unknown / not assessed
Any documented haze	[events / assessed (%)]	[events / assessed (%)]	[n per group]
Haze grade at selected endpoint	[n/N (%) per grade]	[n/N (%) per grade]	[unknown grade n]
Delayed epithelial healing	[events / assessed (%)]	[events / assessed (%)]	[n per group]
Corneal infection	[events / assessed (%)]	[events / assessed (%)]	[n per group]
Retreatment / additional corneal procedure	[n/N (%); procedure]	[n/N (%); procedure]	[unknown n]
Other complication	[event; n/N (%)]	[event; n/N (%)]	[unknown n]
